Room Booking System

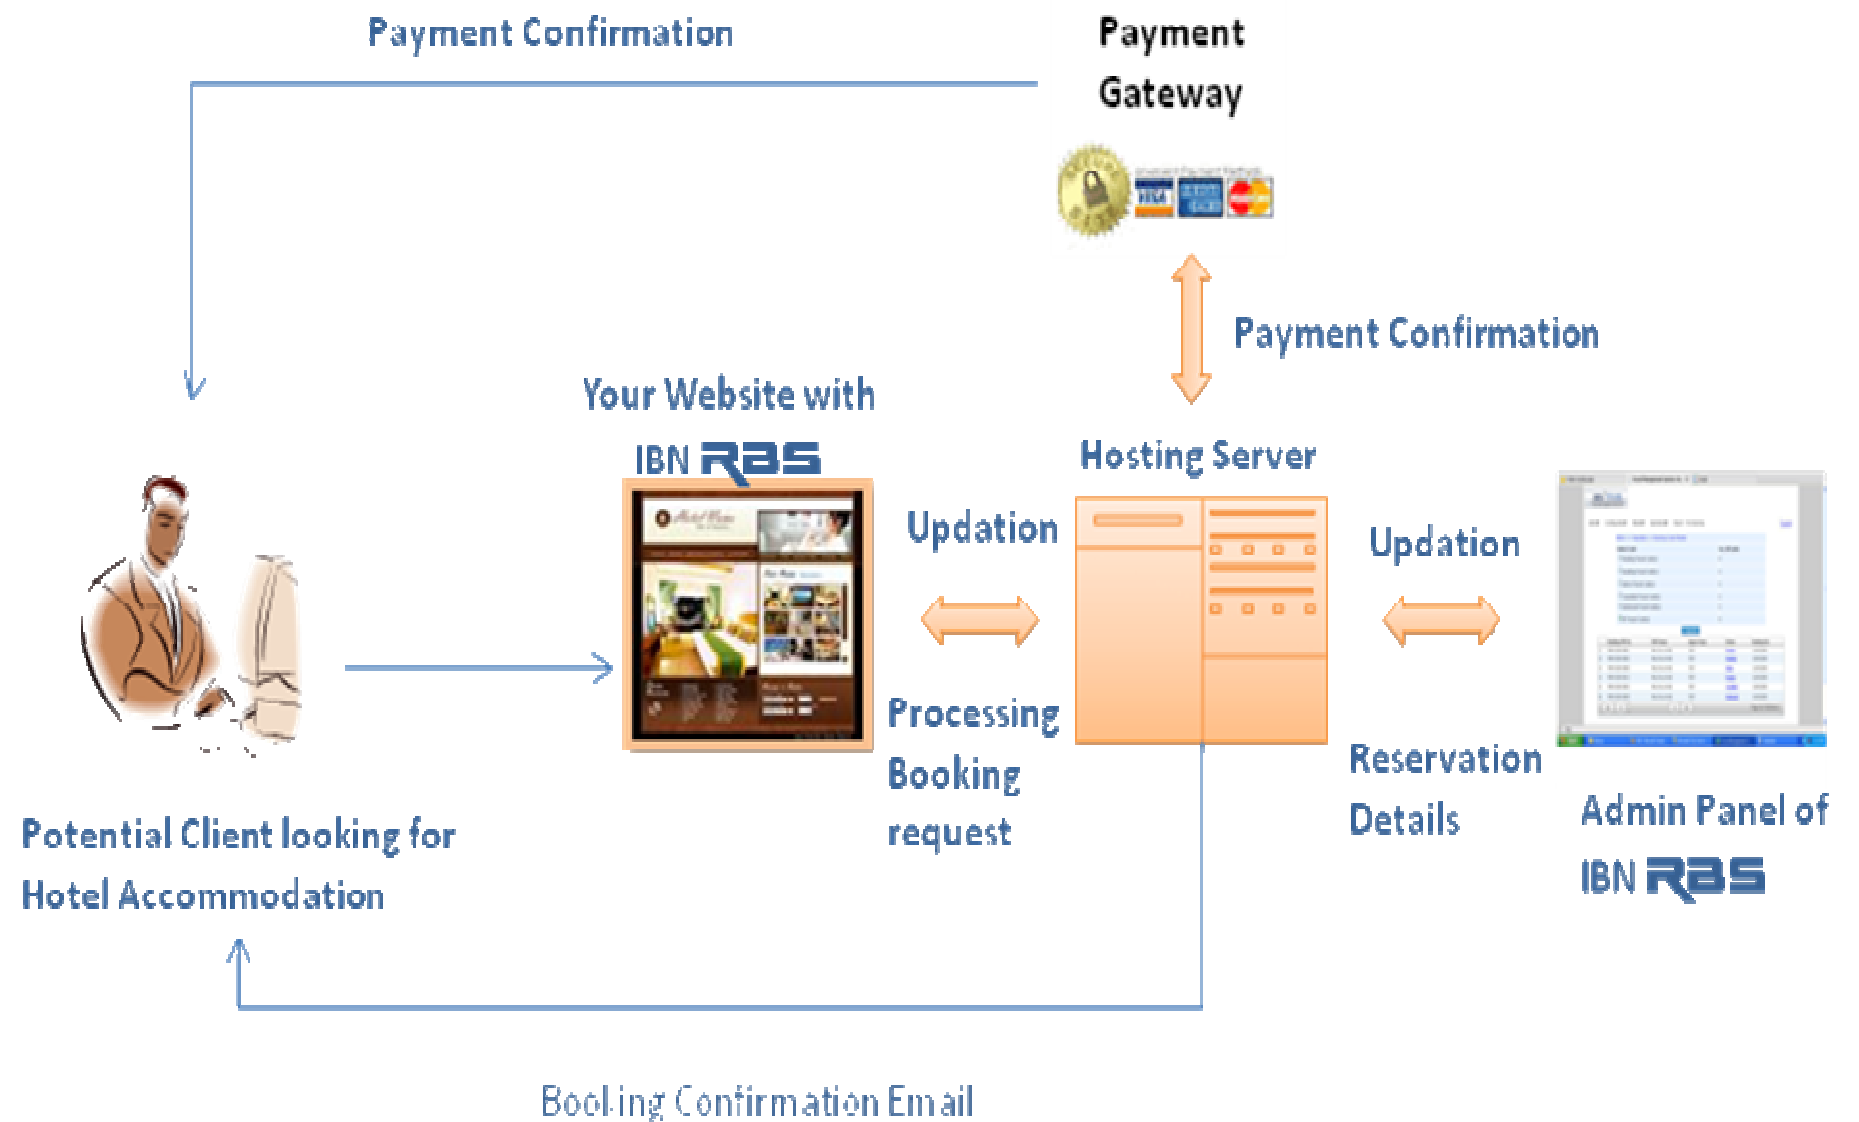

IBN RBS is powerful and comprehensive Online Room Booking System designed for Hotels, Motels, Guesthouses, and Service Apartments Bookings and it can be integrate with existing website as B2B & B2C System. Hotels, Resorts and other Suppliers can now market their Travel & Tourism services directly to customers using IBN online reservation system..

IBN Room Booking Engine transforms your hotel’s website into a revenue center. With booking system you can Power up your Hotel Website to generate direct online availability & confirmation that convert casual visitor to website as a customer, leading to generation of more sale and profit.

It allows selling rooms at different rates for different weekdays/seasons/occupancy. It allows offering discounted rates to travel agents and corporate clients. It allows real time checking and updating of room availability and any cancelled booking can easily be reversed and the rooms made available.

RBS has been specially designed to overcome online Booking requirements for Travel & Tourism Service Providers. IBN RBS is
