IBN TRADE

Trade Management System

CONNECTING YOUR BUSINESS FUNCTIONS TO THE TECHNOLOGY RESOURCES YOU NEED

Every organisation whether big or small strives hard to earn profit, earning a good turnover has always been the primary and also the sole motive of any business. To achieve this motive it's important to do business methodically. It's necessary to keep a record of the profit and loss of the company and this responsibility needs to be handled by proficient software. Recording day to day transactions of a company is a mind-numbing job. To do this brainwork a company needs to have competent software which can handle all necessary business functions of an organisation. Any incorrect/incomplete recording can lead to miscalculations.

When developing IBN Trade we tried to conceptualize from the view point of Retail & other related businesses, making sure that we could arrive at a complete business management solution that took away some of the difficulty in making the right decision about which system was right for the business, by creating a system that so adeptly handled the listed concerns that it became an obvious choice.

IBN TRADE has been specially designed to overcome separate business functions requirement like Accounts, Sales, Purchase, Inventory, etc. in to one software solution. It runs in a Window Environment and allows user to use Keyboard or Mouse to easily navigate to any screen. IBN TRADE is

- ✓ **Scalable Windows Application**
- ✓ **Real Time information available to all network users**
- ✓ **User Access control to restrict access operations**
- ✓ **Superior design delivers superior network performance**
- ✓ **Developed using latest Software Technology**

IBN TRADE covers functionality relating to all necessary business functions like Sales/Purchase Order, Goods In/Out, Sales/Purchase Invoicing, Receivables/Payables, Nominal Ledger, Credit/Debit Note, Separate Forms for Income & Expense Booking, Contra Entry, Dynamic Charts of Accounts, Income Statement, Balance Sheet, Cash/Bank Book, Bank Reconciliation, Batch wise Inventory Management with expiry details, and much more.....
